How do I join my IP Address to a Minecraft Server? – To connect to a Minecraft server, you will need an IP address or host name of the server.

Connecting your Minecraft server via your IP address is the same as connecting to it directly through the internet without requiring any extra software. The primary way to get an IP address is by going into your internet browser's settings page and finding out what the current addresses given from your provider are for you. If you are using a Bukkit or Tekkit server, then this should be included with their connection instructions. With individual servers, there are a couple ways that you could go about getting this information. The first way would be to simply ask the host if you can connect to their IP address and they will give it to you. Otherwise, you can go through your router configuration page to find out the information that you need.",

While in general it is unfair and unwanted by most of the server community, these actions are allowed in moderation if it done for fun or is done in moderation. Ie: glitching via mods to get through a maze or etc. The aforementioned forms of cheating are not accepted under any circumstance unless properly documented, if the cheat is known and can be done by most people then it's deemed not acceptable unless given permission by admins. So be careful what you do, so that if caught you don't get banned from the server or even Mojang servers."
